

DSR & Resource Management System - Business Requirements Document

Version 2.0

Purpose

Provide a centralized system for employees to submit Daily Status Reports (DSR), track project effort, monitor AI tool usage, and enable managers to track resource utilization.

User Roles

Employee: Create and manage own DSRs. Manager: View team reports and utilization. Admin: Manage users, projects, roles, and system settings.

Authentication

Support two authentication methods: (1) SSO Login via Microsoft Entra ID/Azure AD. (2) Database Login using Email and Password stored in the application database.

Project Management

Maintain active projects with Name, Code, Description, Start Date, End Date, and Status.

DSR Business Flow

An employee can submit ONE DSR per day. Within the DSR, the employee can add MULTIPLE work/task entries. Each work entry is associated with ONE project only. Therefore, an employee can work on multiple projects in a day by adding multiple entries.

DSR Header Fields

Work Date, Employee Details (auto-populated), AI Used Today (Yes/No), AI Tool Name (shown when AI is Yes), AI Usage Remarks.

DSR Work Entry Fields

Project (single selection), Estimated Hours, No Work Done checkbox, Rich Text Description, Add Entry, Remove Entry.

Validation Rules

Future dates not allowed. One DSR per employee per day. AI usage selection is mandatory. Hours must be between 0 and 24. If No Work Done is checked, hours become 0. Project selection is mandatory for normal work entries.

Dashboards

Employee Dashboard: daily, weekly, monthly summaries. Manager Dashboard: resource utilization, project effort, missing DSRs, AI adoption metrics. Admin Dashboard: system-wide reporting.

Reports

Employee Report, Project Report, Resource Utilization Report, AI Usage Report, Date-wise and Project-wise filtering.

Database Entities

Users, Roles, UserRoles, Projects, DSR, DSRTask.

Recommended Database Structure

DSR stores daily submission information. DSRTask stores project-specific work entries allowing multiple projects per day.
