

DSR & Resource Management System - Business Requirements Document (v3)

Purpose

Track employee daily work status, project effort, AI tool usage, and resource utilization.

Authentication

Support SSO Login and Database Login.

Roles

Employee, Manager, and Admin.

Corrected DSR Requirement

An employee can create multiple DSR entries on the same day. Each DSR entry is linked to one project only. If an employee works on Project A and Project B on the same date, the employee will create and save separate DSR entries for each project.

DSR Fields

Project, Work Date, Estimated Hours, No Work Done, AI Usage (Yes/No), AI Tool Name, Rich Text Description.

Validation Rules

Future dates not allowed. Project required. AI Usage mandatory. Hours between 0 and 24. If No Work Done is checked, hours should be 0.

Reports

Employee, Project, Resource Utilization, and AI Usage reports.

Database Design

Users, Roles, UserRoles, Projects, DSR. Each DSR record stores a single project work entry.
